THIS Table contains so much of the Calendar as is necessary for the determining of *Easter*; to find which, look for the Golden Number of the year in the first column of the Table, against which stands the day of the Paschal Full Moon; then look in the third column for the Sunday Letter, next after the day of the Full Moon; and the day of the month standing against that Sunday Letter is *Easter-Day*. If the Full Moon happen upon a Sunday, then (according to the first rule) the next Sunday after is *Easter-Day*.

To find the Golden Number, or Prime, add 1 to the year of our Lord, and then divide by 19; the remainder, if any, is the Golden Number; but if nothing remain, then 19 is the Golden Number.

To find the Dominical or Sunday Letter, according to the Calendar, until the year 1899, inclusive, add to the year of our Lord its fourth part, omitting fractions, divide the sum by 7, and if there be no remainder, then A is the Sunday Letter; but if any number remain, then the Letter standing against that number in the small annexed Table is the Sunday Letter.

NOTE. That in all Bissextile or Leap Years, the Letter found as above will be the Sunday Letter from the intercalated day exclusive, to the end of the year.

TO make use of the preceding Table, find the Sunday Letter for the Year in the uppermost line, and the Golden Number, or Prime, in the column of Golden Numbers, and against the Prime, in the same line, under the Sunday Letter, you have the Day of the Month on which *Easter* falleth that year. But

NOTE. That the name of the Month is set on the left hand, or just with the figure, and followeth not as in other Tables, by descent, but collaterally.

Note. That in a Bissextile or Leap-Year, the number of Sundays after Epiphany will be the number of the Easter-Day had fallen one day later than it really does. And, for the same reason, in every Leap-Year, be added to the day of the month given by the Table for Sunday, and for the first day of Lent: unless the Table gives some day in the month for it: for in that case, the day given by the Table is the right day.

THE Golden Numbers in the foregoing Calendar will point out the days of the Paschal Full Moon, till the year of our Lord 1900; at which time, in order that the Ecclesiastical Full Moons may fall nearly on the same days with the real full Moons, the Golden Numbers must be removed to different days of the Calendar, as is done in the annexed table, which contains so much of the Calendar then to be used, as is necessary for finding the Paschal Full Moons, and the Feast of *Easter*, from the year 1900, to the year 2199, inclusive. This Table is to be made use of, in all respects, as the first Table, before inserted, for finding *Easter* till the year 1899.

TO find the Dominical or Sunday Letter for any given year of our Lord, add to the year its fourth part, omitting fractions, and also the number, which, in Table I., standeth at the top of the column wherein the number of hundreds contained in that given year is found; divide the sum by 7, and if there be no remainder, then A is the Sunday Letter; but if any number remain, then the Letter which standeth under that number at the top of the Table, is the Sunday Letter.
